

Rouska Nikolaev - VP of Engineering and Operations

50 years old. Lives in Tel Mond, Israel.

Holds an advanced degree in Water and Sewage Engineering, specializing in wastewater purification and another master degree in environmental management. She completed her studies in Bulgaria and a few years later immigrated to Israel.

She began her work in Israel in a planning company and later approved planning projects at the Raanana Municipality. Over the years she was project manager and manager of Water and Sewage Department, and eventually a senior engineer at the Mei Ra'anana Water and Sewage Company.

Rouska began working in Mei-Avivim at the end of 2015 as VP of Engineering and Operations. Manages seven departments and ninety employees in addition to contractors, project managers and external service managers. Leads to a change in the concept of preventive maintenance in the company and the planning system from a long-term perspective. Also taking into consideration the urban renewal and the large transportation projects.
